

**Control Your World**  
Home automation moulded around you

# Home automation moulded around you

a unique system that can grow with you.

In today's world it's difficult to maintain control over every aspect of your busy life. **Control Your World** home automation can mould your living space around your lifestyle, ensuring you have the freedom and control to truly enjoy your sanctuary.

Unparalleled reliability, discreet and flexible, **Control Your World** products can future-proof your home. The modular design of the system means that you can choose which functions of your home you want to control. Start with one or two, and create - at your convenience - a unique system that can automate your home completely.

Offering increased security, energy efficiency and added comfort, **Control Your World** installations are a sound financial investment which can be altered and added to by you or your home's future owners.

## ENVIRONMENT

With **Control Your World** installations energy efficiency comes as standard. Without compromising your way or quality of life, it saves you money and helps to cut overall carbon emissions.

The efficient controls of the system help to prolong the life of electrical consumable items.

Plus, as the price of energy continues to spiral upwards - and presently shows no sign of slowing down - the **Control Your World** systems start paying for themselves from day one.

## COMFORT

All systems are easy to use and set up to reflect your preferences. It does what you want it to do, when you want it to. No long menu options and a multitude of remote controls. Your home's lighting, heating, AV equipment, security and entire home environment can be programmed to respond to a single hand-held control.

These intelligent solutions mean an enviable lifestyle can easily be achieved, as a superior level of home comfort, security and energy efficiency are absolutely guaranteed.

## ENTERTAINMENT - INTELLIGENT AUTOMATION THAT'S FULL OF LIFE

Transform your home into your dimensional haven. Seamless integration of lighting, sound and AV enables you to experience home-cinema and multi-room high fidelity audio throughout your home.

Almost invisibly installed within the fabric of the building, the very best audio video can be programmed to complement your mood or activity pattern and enjoyed at the push of a button.

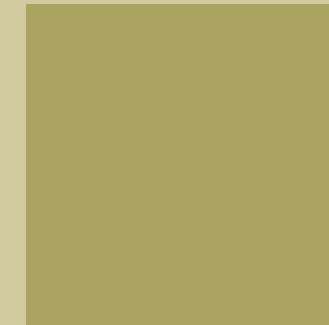

# Helping homes to think, sense and respond

## Functionality that suits any style.

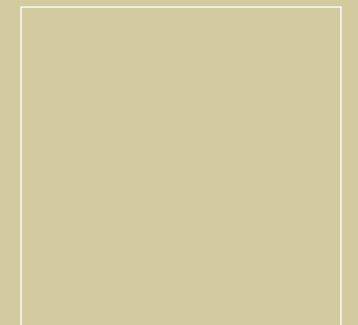

Form and function go hand in hand with **Control Your World** installations. You demand the delivery of high level performance yet the aesthetics must not compromise the overall look and feel you desire.

By incorporating **Control Your World** systems into your home from the outset you can help unlock it's full potential; making it an intelligent, secure and desirable property.

Once installed, the add-on possibilities this automated network can offer the home owner are infinite. Whilst the impact on your plans may be minimal, the scope of your design will be phenomenal.

Digital-recording CCTV; video door entry system; biometric security entry system; intruder alarm systems...

### STYLE

Completely hidden from view, the only clue that an intelligent solution is installed is the presence of the ultra-chic, sleek and stylish multi-functional wall fittings. Available in a myriad of colours and finishes, they add style and luxury, and complement any interior design.

### SAFETY

Intelligent protection from **Control Your World** constantly monitors your living space for intrusion, fire, carbon monoxide, water and gas leaks. In the event of an alarm being activated, the system automatically isolates water and gas, operates emergency exit lighting or any other pre-programmed safety procedures whilst simultaneously sending SMS alert messages to your (or any nominated) phones. These automated control measures along with the information-giving messages allow you to take control of the situation.

### SECURITY

Enjoy the peace of mind and control our intelligent security gives you. The ability to monitor your property and possessions at home through your TV, or remotely from the other side of the world via the internet, is yours. Integrating seamlessly with cutting edge technologies, you can choose to install digital-recording CCTV; video door entry system; biometric security entry system (finger-print or retinal recognition); intruder alarm systems; the At Home\* presence simulation; and much more.

\* The 'At Home' simulation: records lighting (and curtain) activity while you are in, and replays it when you are away from the property to create the illusion that the house is occupied.

# Control Your World's flexible approach to living

Placing lifestyle at the centre of your living experience.

Having absolute control of your lighting adds a new depth to your living space. Dim the lights, or for a more dramatic effect, use coloured LED lights to simply and effectively set the scene for dining, entertaining or relaxing.

## COMFORT

At the push of a button; instantly recall a pre-programmed setting which amalgamates the lighting, heating, AV and comfort controls to create the perfect comfort zone.

Control the temperature of each room individually and integrate different heating technologies such as under-floor heating and air-conditioning to complement the atmosphere. Pre-programme the system to set the heating back a few degrees when the house is unoccupied or at night, preventing energy wastage and saving money too.

## REMOTE CONTROL (YOUR WORLD)

Communicating with your home via familiar tools such as the internet and your mobile phone opens up a whole new world of freedom and flexibility.

Send a SMS message to activate the 'At Home' simulation, or to open the gates or garage doors. Via a secure internet link you can, control door-entry to your home, turn the garden lights on and respond to an alarm alert. The options really are endless.

And as with all great relationships, this one is two-way; your home will respond to your commands by confirming an instruction has been carried out, and will notify you of a tripped alarm or alert.

## AUDIO VIDEO

**Control Your World's** multi-room entertainment systems offer elegance, simplicity and superb high fidelity performance, which integrates seamlessly with the comfort controls of the wider system.

Delivering aesthetically pleasing, award-winning technology, the multi-room audio video systems give unprecedented freedom to enjoy home entertainment independently in any number of chosen rooms.

# About us

**Control Your World** shares the same business principal and professionalism as its sister company **Precise Networking Solutions Ltd.**

## A NAME YOU CAN RELY ON

With over 15 years experience installing and designing electrical and data networks for the commercial, educational and industrial sector including bespoke projects for blue-chip organisations Carlsberg UK, Co-Op Bank and BNFL, the company's progression into the residential market was inevitable.

**Control Your World** has, over a number of years, developed relationships with market leading, innovative companies whose knowledge of international integrated 'smart-house' technology is backed up with enviable reputations for quality.

Only by offering products which have undergone extremely rigorous tests, and creating natural partnerships with these tried and tested market leaders can we aim to provide the best possible systems for the UK housing market.

Such is our drive and commitment to the smart home revolution, we have invested in the creation and development of a (160 sq metre) fully automated, apartment-style showroom complete with lounge, bathroom, bedroom and display area.

Showcasing the flexibility of home automation as well as the fully integrated benefits of a multi-room high fidelity AV system, the apartment is a stylish haven for plasmas, including the tile-TV, home-cinema experience, LED lighting effects, plasma-hiding furniture as well as a multitude of integrated gadgets.

You are very welcome to 'experience' our showroom, however due to the bespoke nature of our company we would simply ask that you schedule an appointment prior to your visit.

For more information on how  
you can **Control Your World**  
'experience' our showroom.
